

# WHAT PROBLEM ARE WE SOLVING?

*Course selection can be difficult.*

Every semester, tertiary students have to enroll for courses that they want to take. They use the ANU website and seek out third parties for suggestions and reviews of certain courses. Sometimes it's a logistical nightmare, and it's impossible to decide on what courses to choose from.

This is where AI Course Selection comes in.

# WHY DO WE CARE?

**JUST DUDES FROM  
THE OUTBACK**

*We understand the struggle.*

As guys who grew up on the farm without much access to airports or any of the fancy frills that come with travel, we want to make the experience easier for everyone.

# 250

People are accessing online travel apps per second in Australia alone.

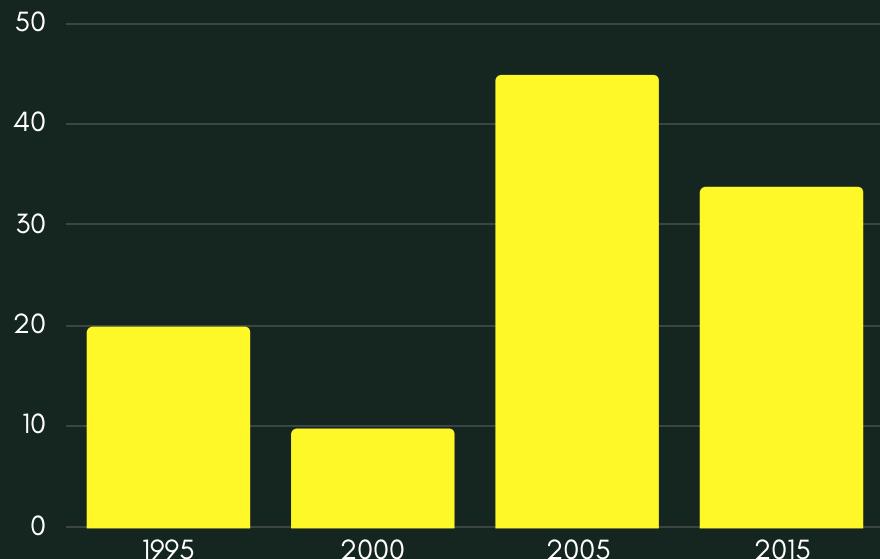

## WHAT WE DO

*"Travel is a way of life."*

Begin your pitch with a compelling story. If you can relate your story to your audience, even better! Your story should address the problem you're solving in the marketplace.

# THE DETAILS

*The things that matter.*

- We want to make travel more accessible to everyone
- Travel should be a luxury, not a chore
